

VTF EXCAVATION

BORING Services

Go above and beyond traditional trenching with our HDD services!

Directional boring or horizontal directional drilling (HDD) is an effective way to get utilities from one point to another without destroying the existing ground or obstacles in the process. HDD goes beyond traditional trenching with the ability to connect utilities or services in places that would otherwise be inaccessible.

- ✓ Reduced soil disturbance
- ✓ Single location to install different pipes
- ✓ Reduces contamination
- ✓ Protects the ecosystem
- ✓ Safer operation than open cut
- ✓ Limited traffic and landscape disruption
- ✓ Ideal for sites sensitive to surface disruption
- ✓ Reduces excavation and shoring costs
