

VTF EXCAVATION

MR. MANHOLE Services

Issues with sagging, leaking or unsafe manholes?

VTF has the answer! Instead of using square cuts, the Mr. Manhole method uses round cuts around the frame to quickly and safely extract the problematic manhole. Once the frame is replaced, we lay concrete around the new manhole for a smooth and level finish.

- ✓ Permanently stops leakage
- ✓ Perfectly level with the road every time
- ✓ Very durable, time tested repair method
- ✓ Safety of repair crews
- ✓ 20% less material removed and replaced
- ✓ OSHA silica regs compliant
